

**a**

```

graph TD
    A[chemical fuel reaction] --> B[entropy-balance benchmark]
    B --> C[reversible heating between T_C and T_H]
    C --> D[maximum delivered heat]
  
```

**C**

```

graph TD
    A[methane fuel input] --> B[fuel-derived work]
    B --> C[heat-upgrading block]
    C --> D[sink-side heat delivery]
    E[combustion-side remainder -> recoverable heat]
  
```
